SUMMARY

I'm a final-year Computer Science student who loves solving problems and turning ideas into working tech. With a solid foundation in programming, cloud tools, and software development, I enjoy learning new things and taking on challenges that push me to grow. I'm comfortable working with Python, C++ and web technologies, and I thrive in team environments where I can contribute, collaborate, and keep improving every day.

TECHNICAL SKILLS

Languages	: C/C++, Python
Web Development	: HTML, CSS, JavaScript, PHP
Databases	: MySQL
Developer Tools	: VS Code, GitHub
Concepts	: Object-Oriented Programming, Data Structures & Algorithms, Computer Networks, Operating Systems, Software Development, Design Thinking

EXPERIENCE

Web Development Intern <i>El Systems</i>	Jan 2025 - Feb 2025 <i>Remote</i>
- Developed a Book Management System for cataloging and user management. - Improved system performance using PHP, MySQL, JavaScript, HTML/CSS. - Gained hands-on experience in full-stack development, API integration, and database management. - Collaborated effectively in a team environment, resolved real-time issues, and adapted quickly to project needs	

EDUCATION

Jain University <i>B.Tech in Computer Science and Business Systems</i>	2022 – 2026 <i>CGPA: 8.39</i>
Lady Anusuya Singhanian Academy <i>Senior Secondary (CBSE)</i>	2021 – 2022 <i>Percentage: 79%</i>
Shri Jain Public School <i>Secondary (CBSE)</i>	2019 – 2020 <i>Percentage: 95.4%</i>

PROJECTS

Chronic Kidney Disease Prediction	<i>Python, Pandas, Scikit-Learn</i>
- Cleaned 400+ records, managed missing values and engineered features. - Trained Naïve Bayes model with 85% accuracy and 88% precision. - Visualized insights using Matplotlib for better interpretability.	
Real Estate Listing Dashboard	<i>HTML, CSS, Js, Google Maps API</i>
- Built listing dashboard for 100+ properties with live location features. - Used Maps API to display location and routing. - Reduced load times by 50% with lazy loading and optimization.	
CareMatch AI	<i>Python, NumPy, Flask</i>
- Developed ML-based matching system using 10+ caregiver/patient parameters. - Achieved 90% match accuracy; encrypted 1000+ records for privacy. - Created admin dashboard for reviews and assignments.	

CERTIFICATIONS

- Cloud Computing Fundamentals Issued by IBM
- Responsive Web Design Issued by freeCodeCamp
- Programming for Everybody by University of Michigan
